

Flexible Osteotome System

The Flexible Osteotome System provides various Osteotome Blades for both hip and knee revision surgery.

The sharp, flexible blades are well-suited for loosening the implant from cement or bony ingrowth fixation.

BENEFITS

- Quick coupling positive locking mechanism eases use.
- Positive lock slap hammer eases extraction, should blade become wedged.
- Modular handles offer quick blade changes during surgical procedure.
- Assortment of blades accommodates hip or knee revision surgery.
